Microsoft Dynamics 365

What's new: Designing and developing generative AI experiences for your extensions

Dynamics 365 Copilot

Dynamics 365 Copilot

In Business Central:
Marketing text suggestions

Introducing:
Developer tools for Copilot in Business Central

Agenda

- Example use case
- User experience
- AI Module
- Tips and tricks
- Engineering for safety

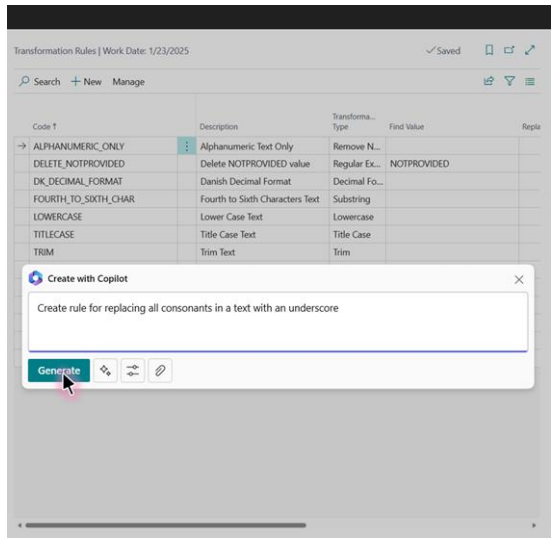
Why

- Prototype with less code
- Consistency of experience
- Common guard rails
- Quicker to market

Intended for

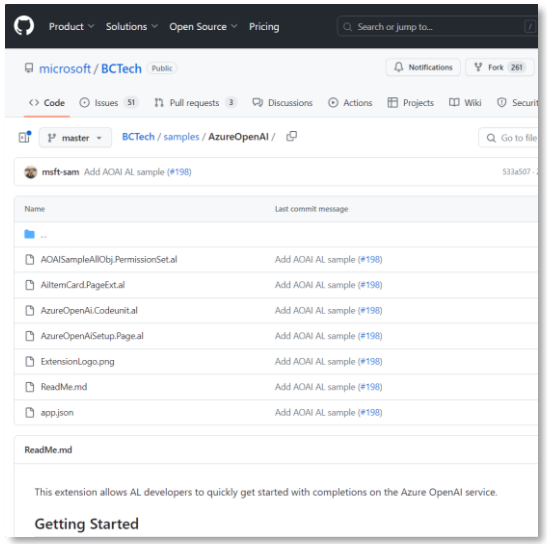
Deployment types	Business Central online
AI	Generative AI assists humans with complex cognitive tasks
Interaction mode	Non-conversational Integrated into business functionality with concrete input and output Human review

What's in the box

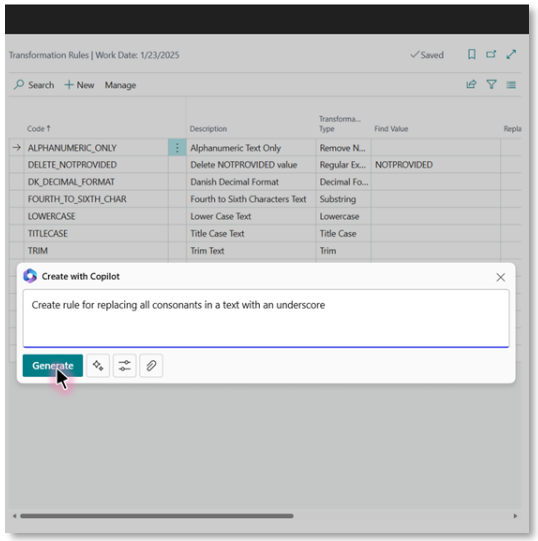


Signature Copilot UI

AI module



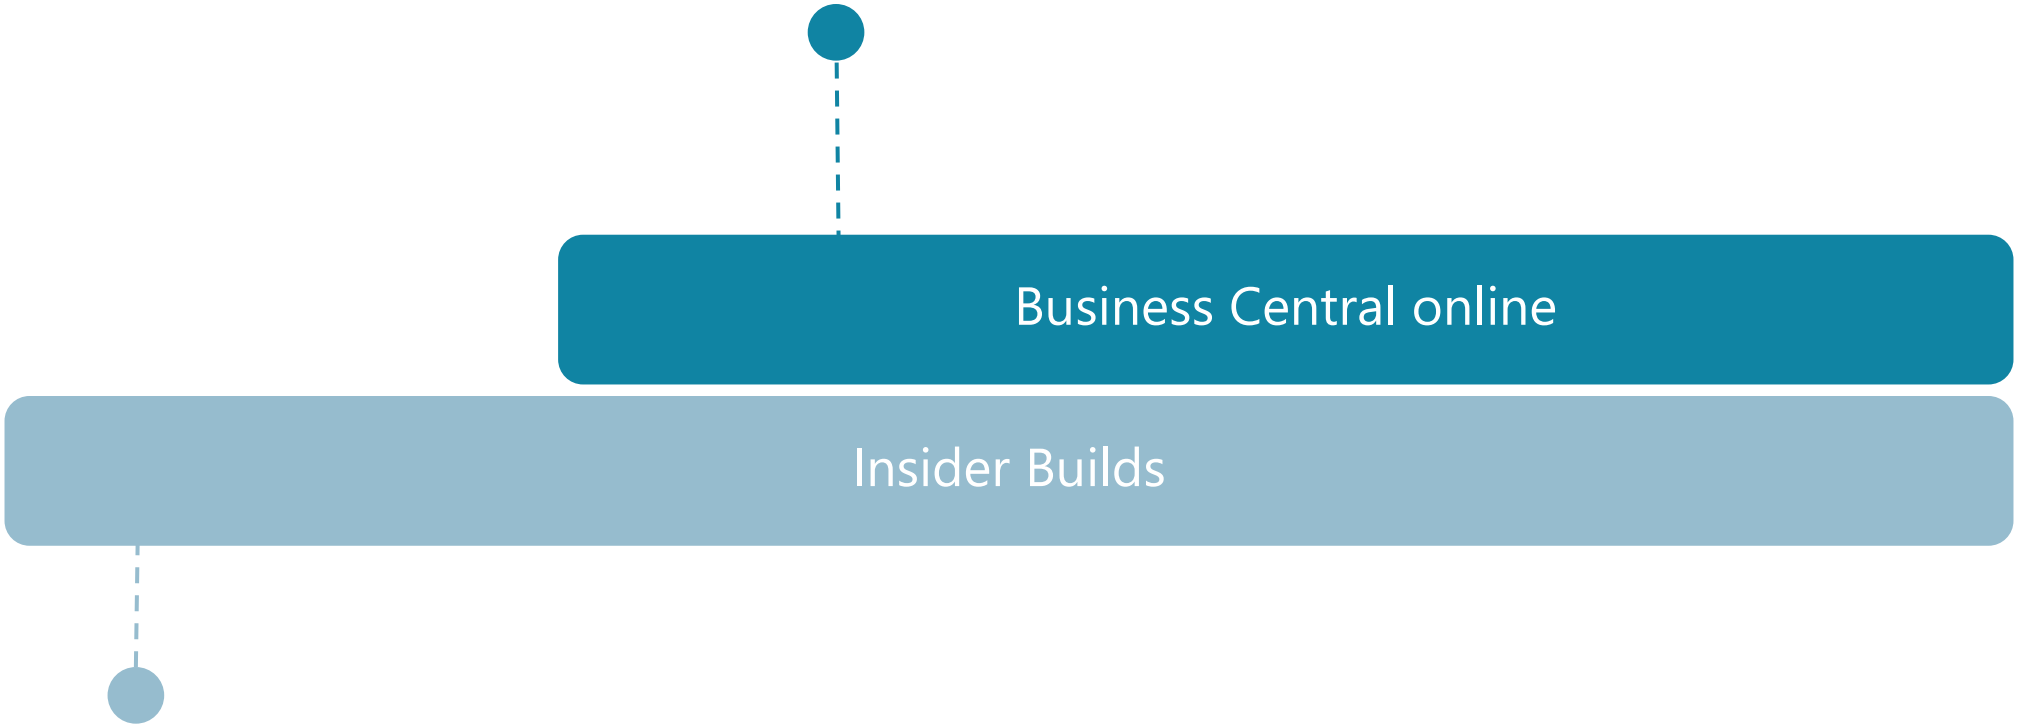
Guides and samples



Common functions

Timeline

Available with Wave 2 minor update (23.X)
Deploy and run online



Available to insiders today
Compile, run, test offline

Example use case

PromptDialog page type

Describe 'ATHENS Desk' by 'Office Desk: Mountable cable trunk i... | 3 of 3 | AI-generated content may be incorrect | Terms of use | Learn more

Elevate your workspace with the sleek and sustainable ATHENS Desk.

The ATHENS Desk is not your average office desk - it's a stylish and sustainable addition to your workspace. Crafted with FSC-certified solid oak and polished stainless steel legs, this desk exudes elegance and durability. The desk's cable management system ensures a clutter-free workspace, with a mountable cable trunk included for added convenience. Measuring 200cm in width, 95cm in height, and 100cm in depth, the ATHENS Desk offers ample space for your work essentials. Whether you're working from home or in the office, this desk is the perfect choice for those who want to elevate their workspace. With the ATHENS Desk, you can enjoy a functional and fashionable workspace that inspires productivity and creativity.

AI Module

- Overview of the module
  - What it can (not) do
  - Prerequisites
- Building your experience
  - Capability registration
  - Authorization
  - Generation
- Optional parameters

Overview of the module

Overview of the module

- Supports Azure OpenAI Service
  - Specifically for LLMs like Text, Chat and Embeddings generations
  - Not image generation like DALL-E or transcribing speech to text like Whisper
- Ease of control and viewing the copilot capabilities in the environment
- Telemetry
  - Allows you to track a capability's registration/usages/errors…

Overview of the module

- The module is in the System Application
- All objects of the developer toolkit can be found in
  - System.AI namespace

Prerequisites

Prerequisites

- Azure OpenAI Resource URL
  - https://[resourcename].openai.azure.com/
- Deployment Name
  - MyGPT3.5
- Azure OpenAI API key

Metaprompt

- What it should do
  - Define the model's profile, capabilities, and limitations for your scenario
  - Define the model's output format
  - Provide example(s) to demonstrate the intended behavior of the model
  - Provide additional behavioral guardrails

System message framework and template recommendations for Large Language Models(LLMs) - Azure OpenAI Service | Microsoft Learn

Metaprompt

“You are an AI assistant in Business Central that helps the user draft project tasks in the following XML format.

```
<project>
  <description></description>
  <tasks>
    <task>
      <description></description>
      <startDate></startDate>
      <endDate></endDate>
      <resourceRole></resourceRole>
    </task>
  </tasks>
</project>
```

If the user asks you a question you don’t know the answer to, say so.”

[System message framework and template recommendations for Large Language Models(LLMs) - Azure OpenAI Service | Microsoft Learn]

*This is only an example and does not encompass limitations, behavioral safeguards, examples of intended behavior etc

Optional Parameters

Optional Parameters

- Supported for Text and Chat completions
- Used to control the models
  - Temperature
  - Max Tokens
  - Presence Penalty
  - And more
- Not all parameters are supported
  - n

Building AI responsibly

Defining what's important

We've identified six principles that we believe should guide AI development and use

Fairness

AI systems should treat all people fairly.

Reliability and safety

AI systems should perform reliably and safely.

Privacy and security

AI systems should be secure and respect privacy.

Inclusiveness

AI systems should empower everyone and engage people.

Transparency

AI systems should be understandable.

Accountability

People should be accountable for AI systems.
