

Introduction to E-invoicing in Business central

Aleksandar Totovic

Wael AbuSeada

Volodymyr Synchuk

Magnus Hartvig Grønbech

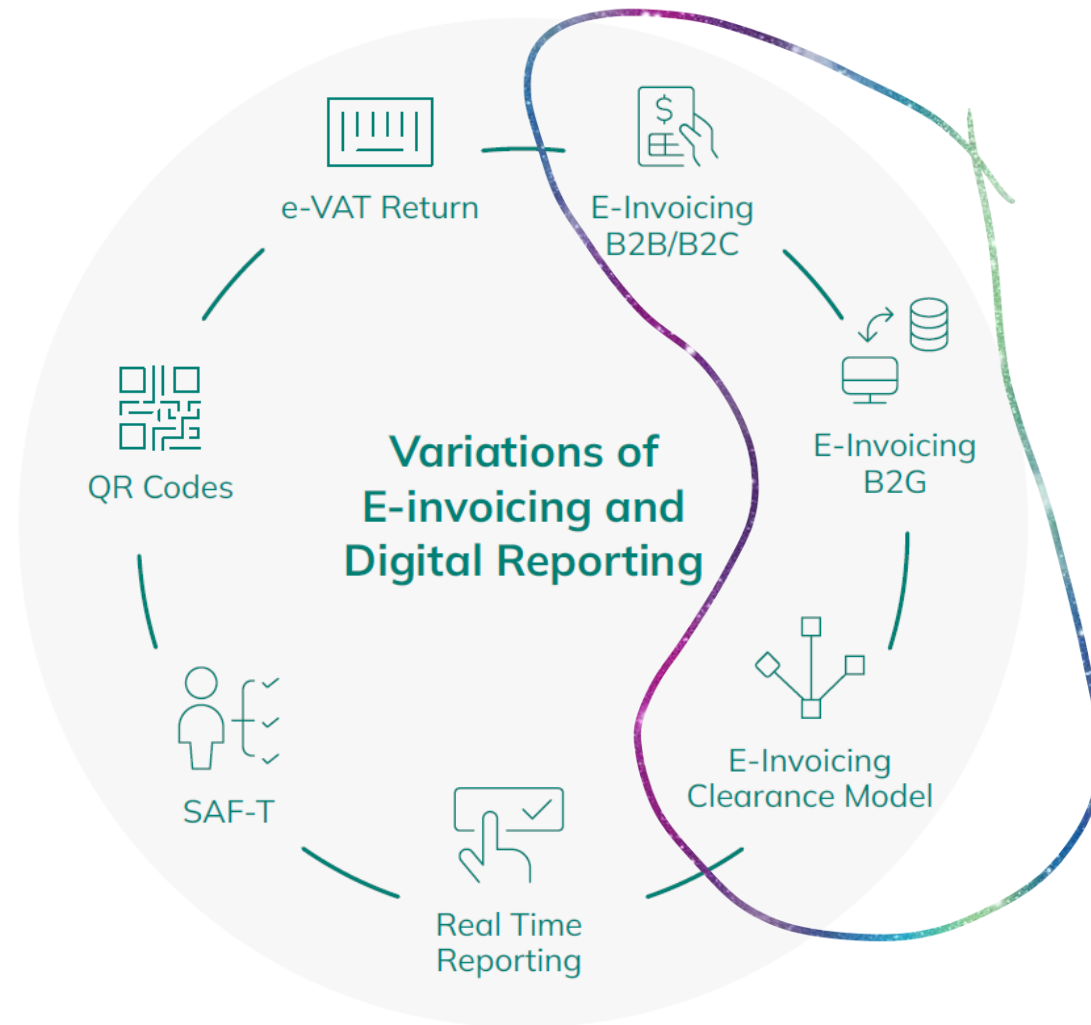

Agenda

- Introduction in E-documents
- High-level architecture
- How it works in the sales process
- How it works in the purchase process
- Available features and the roadmap
- What and how to setup this module

E-documents

Introduction & High-level Architecture

CTC (Continuous Transaction Controls)

What we already have in BC (e-invoicing)

Italy – Fattura PA

Mexico – CFDI

Spain – SII (not e-invoicing, but... real-time reporting)

Partner-based localizations/solutions

Solution:

One global e-invoicing system

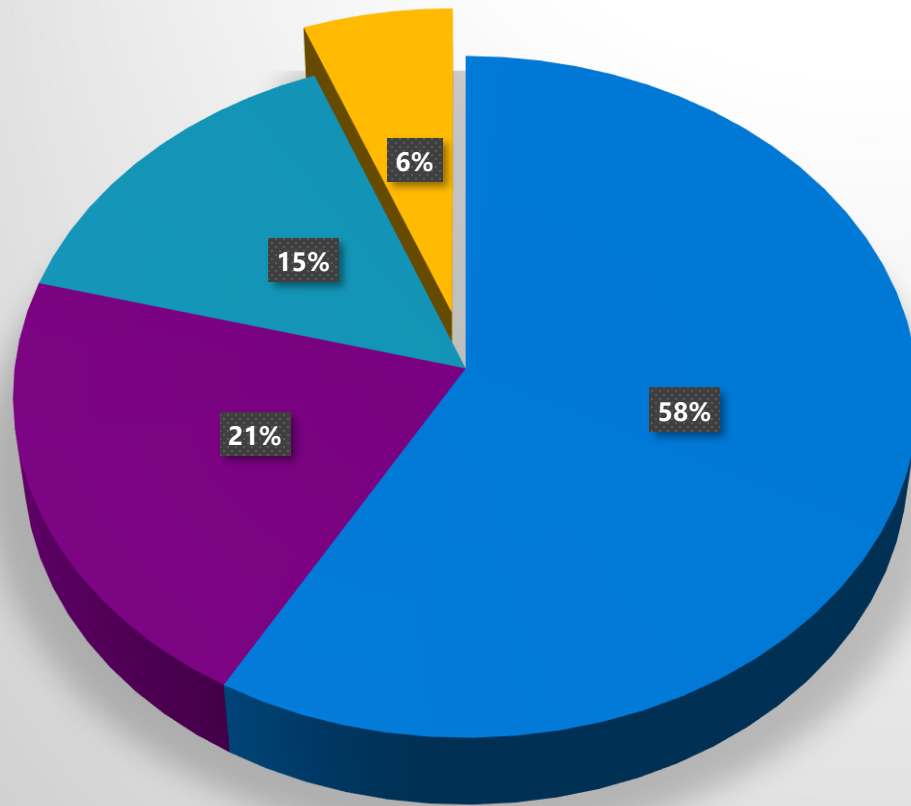

Timeline (enforced)

Research (LinkedIn & Twitter)

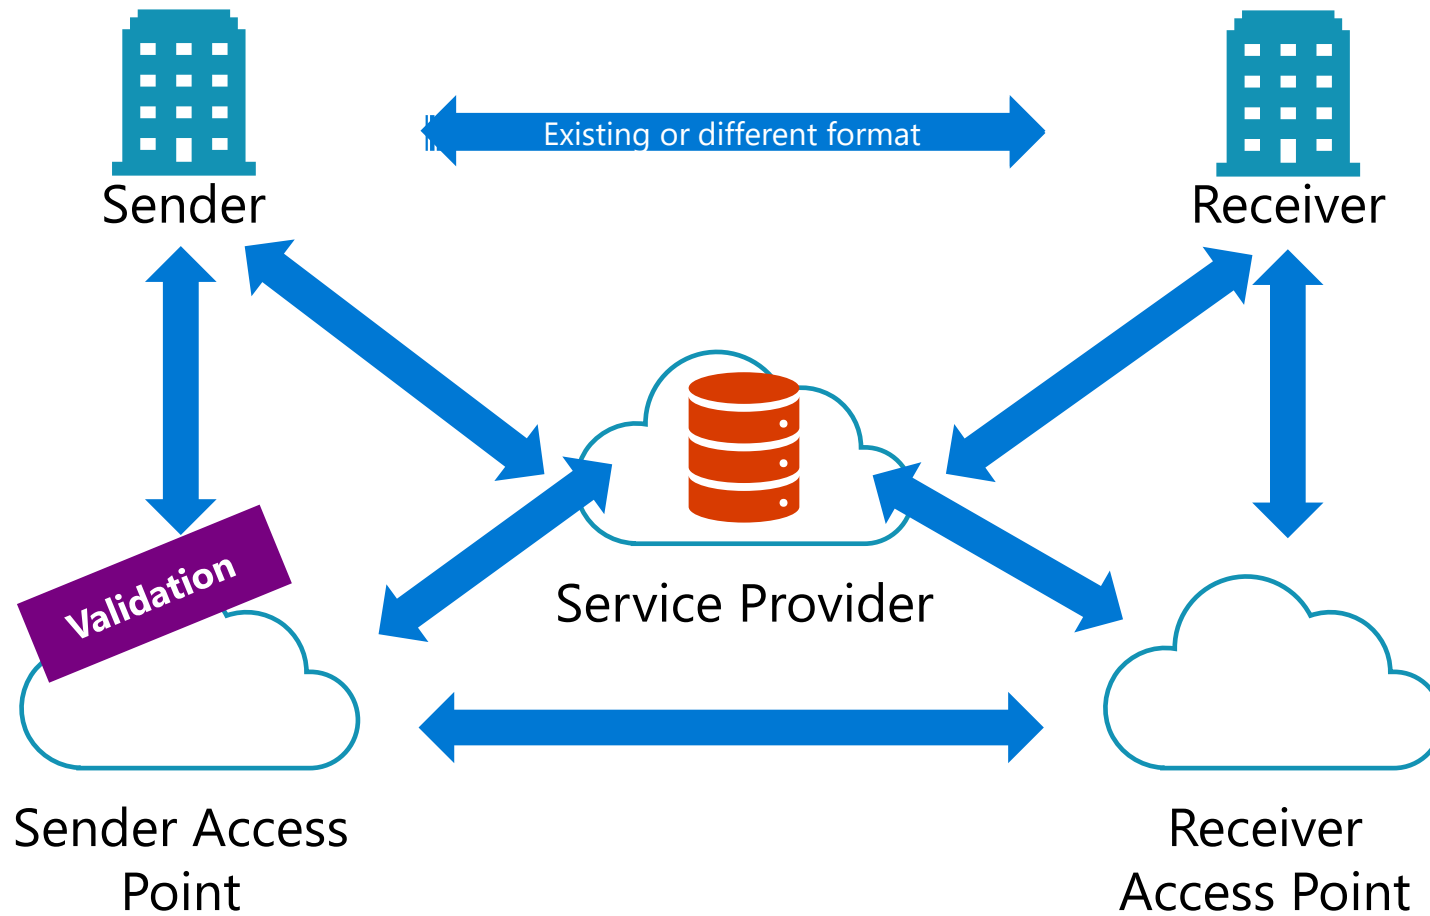

187 participants

Do you like the idea about having e-invoicing module in #MSDyn365BC W1?

- Need it, it is mandatory in my country
- I want it even not enforced in my country
- Expect to be mandatory in my country
- I don't need it / I'll develop it by myself

Different models

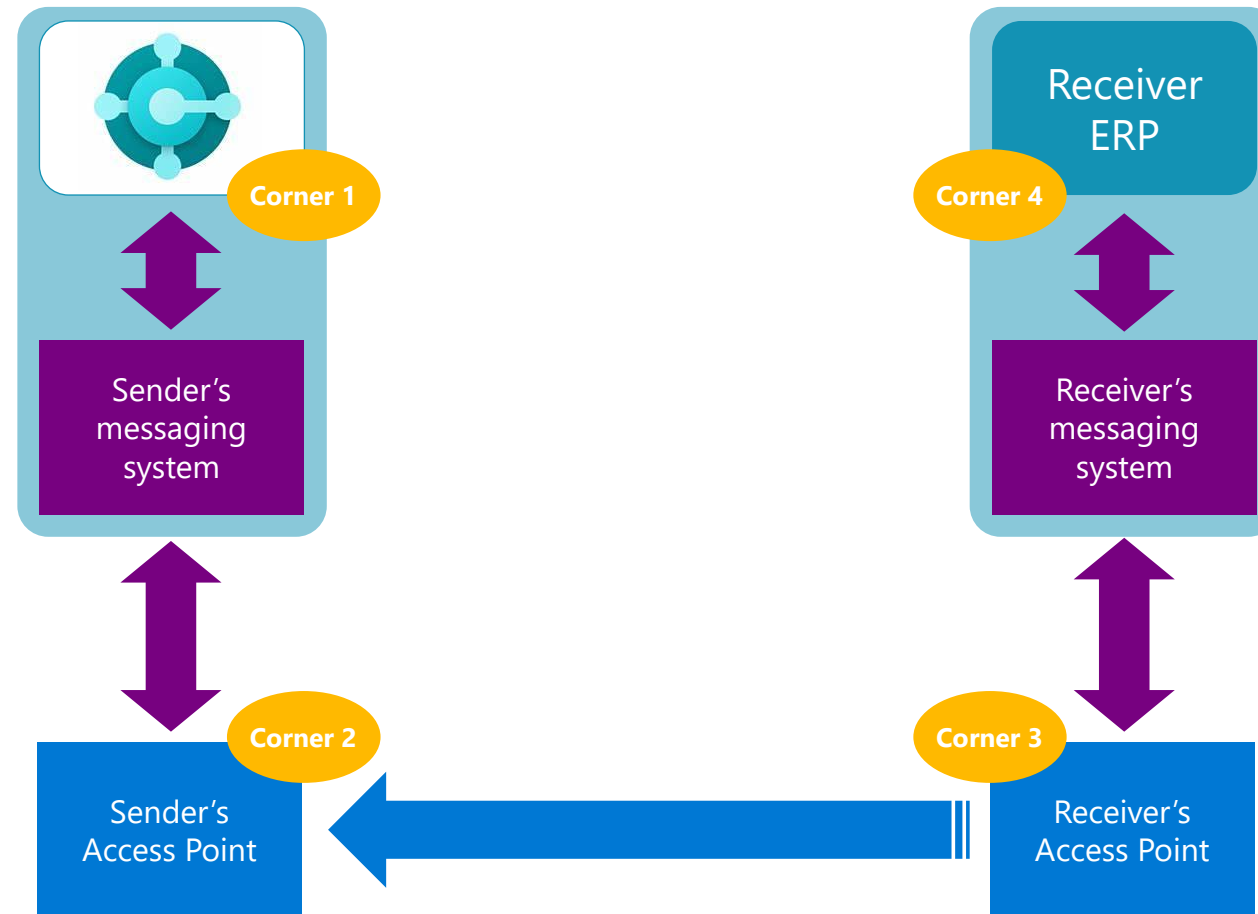

The Two-corner model

The Three-corner model

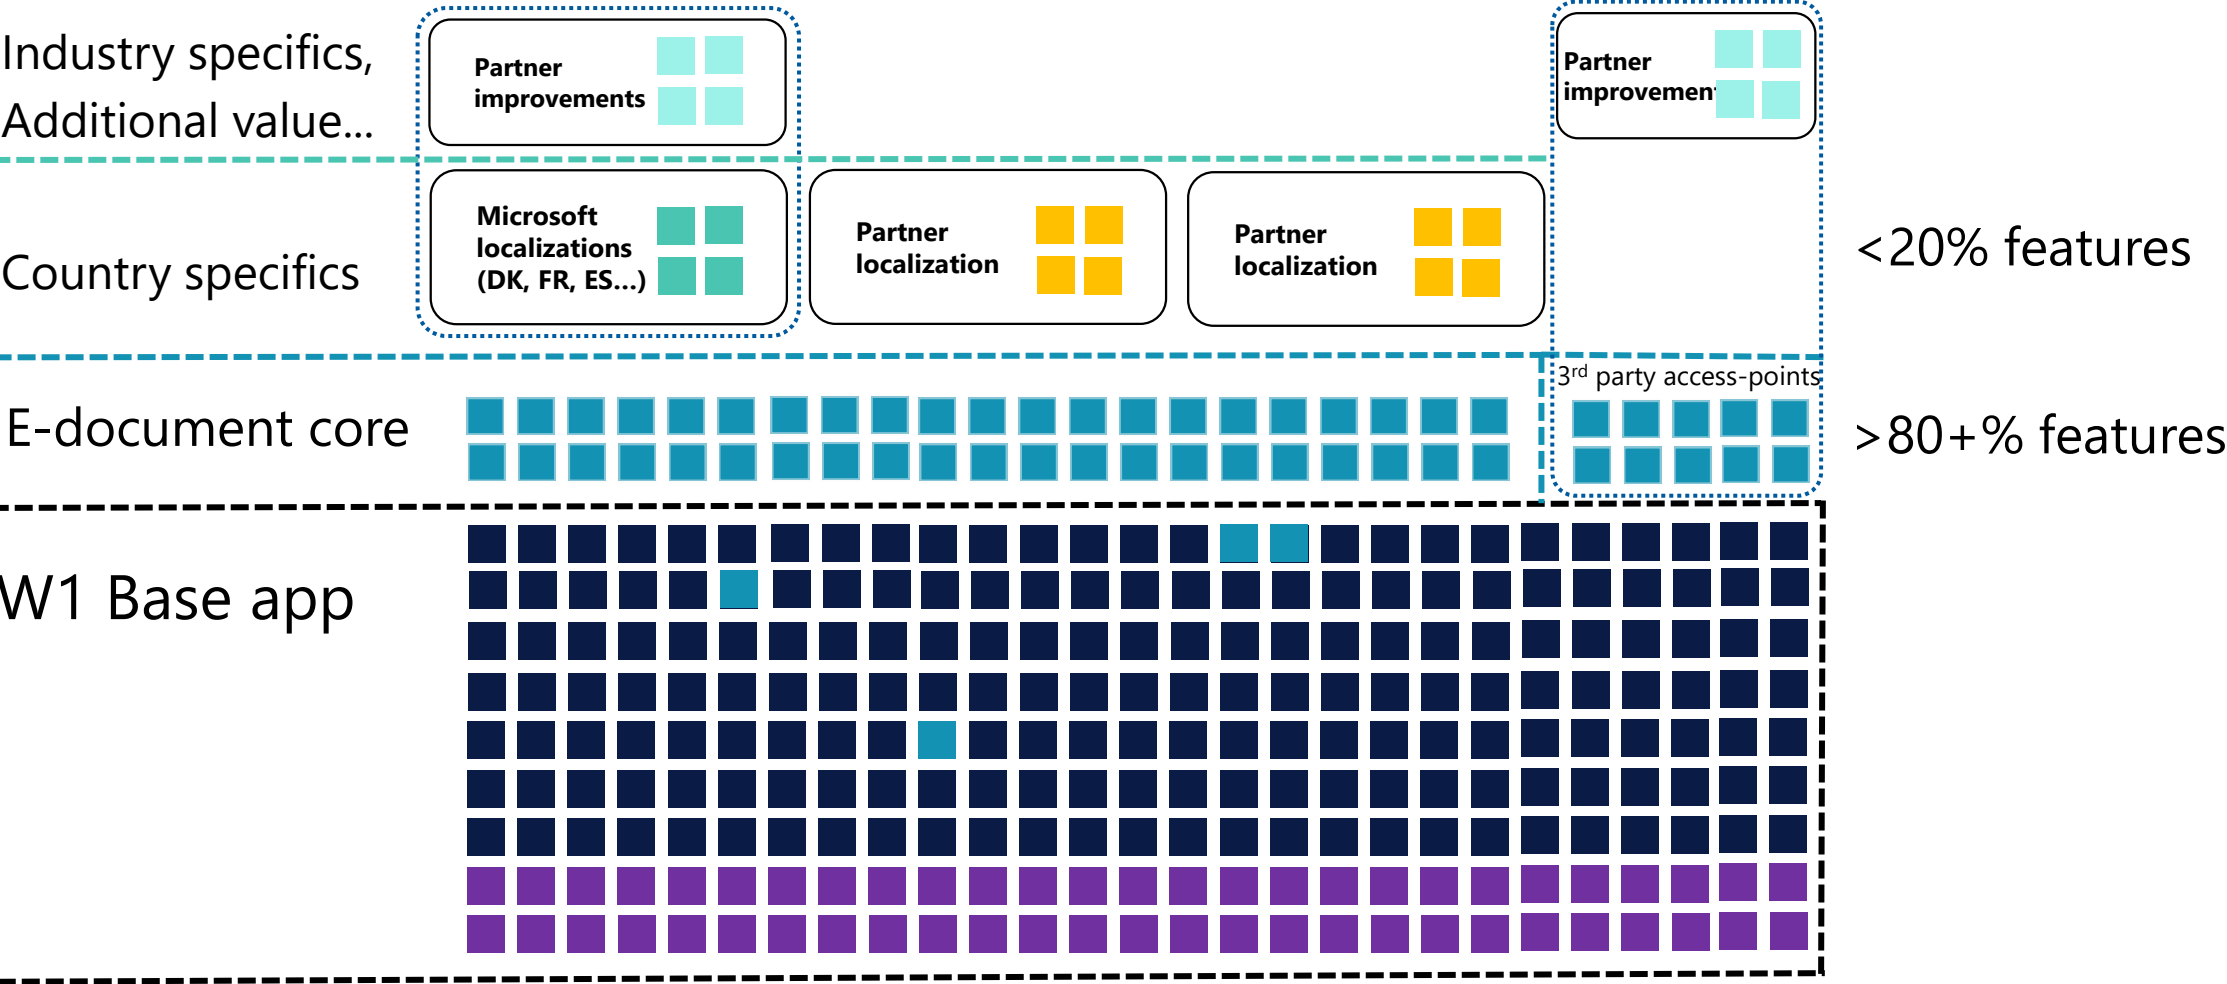

The Four-corner model

...even more

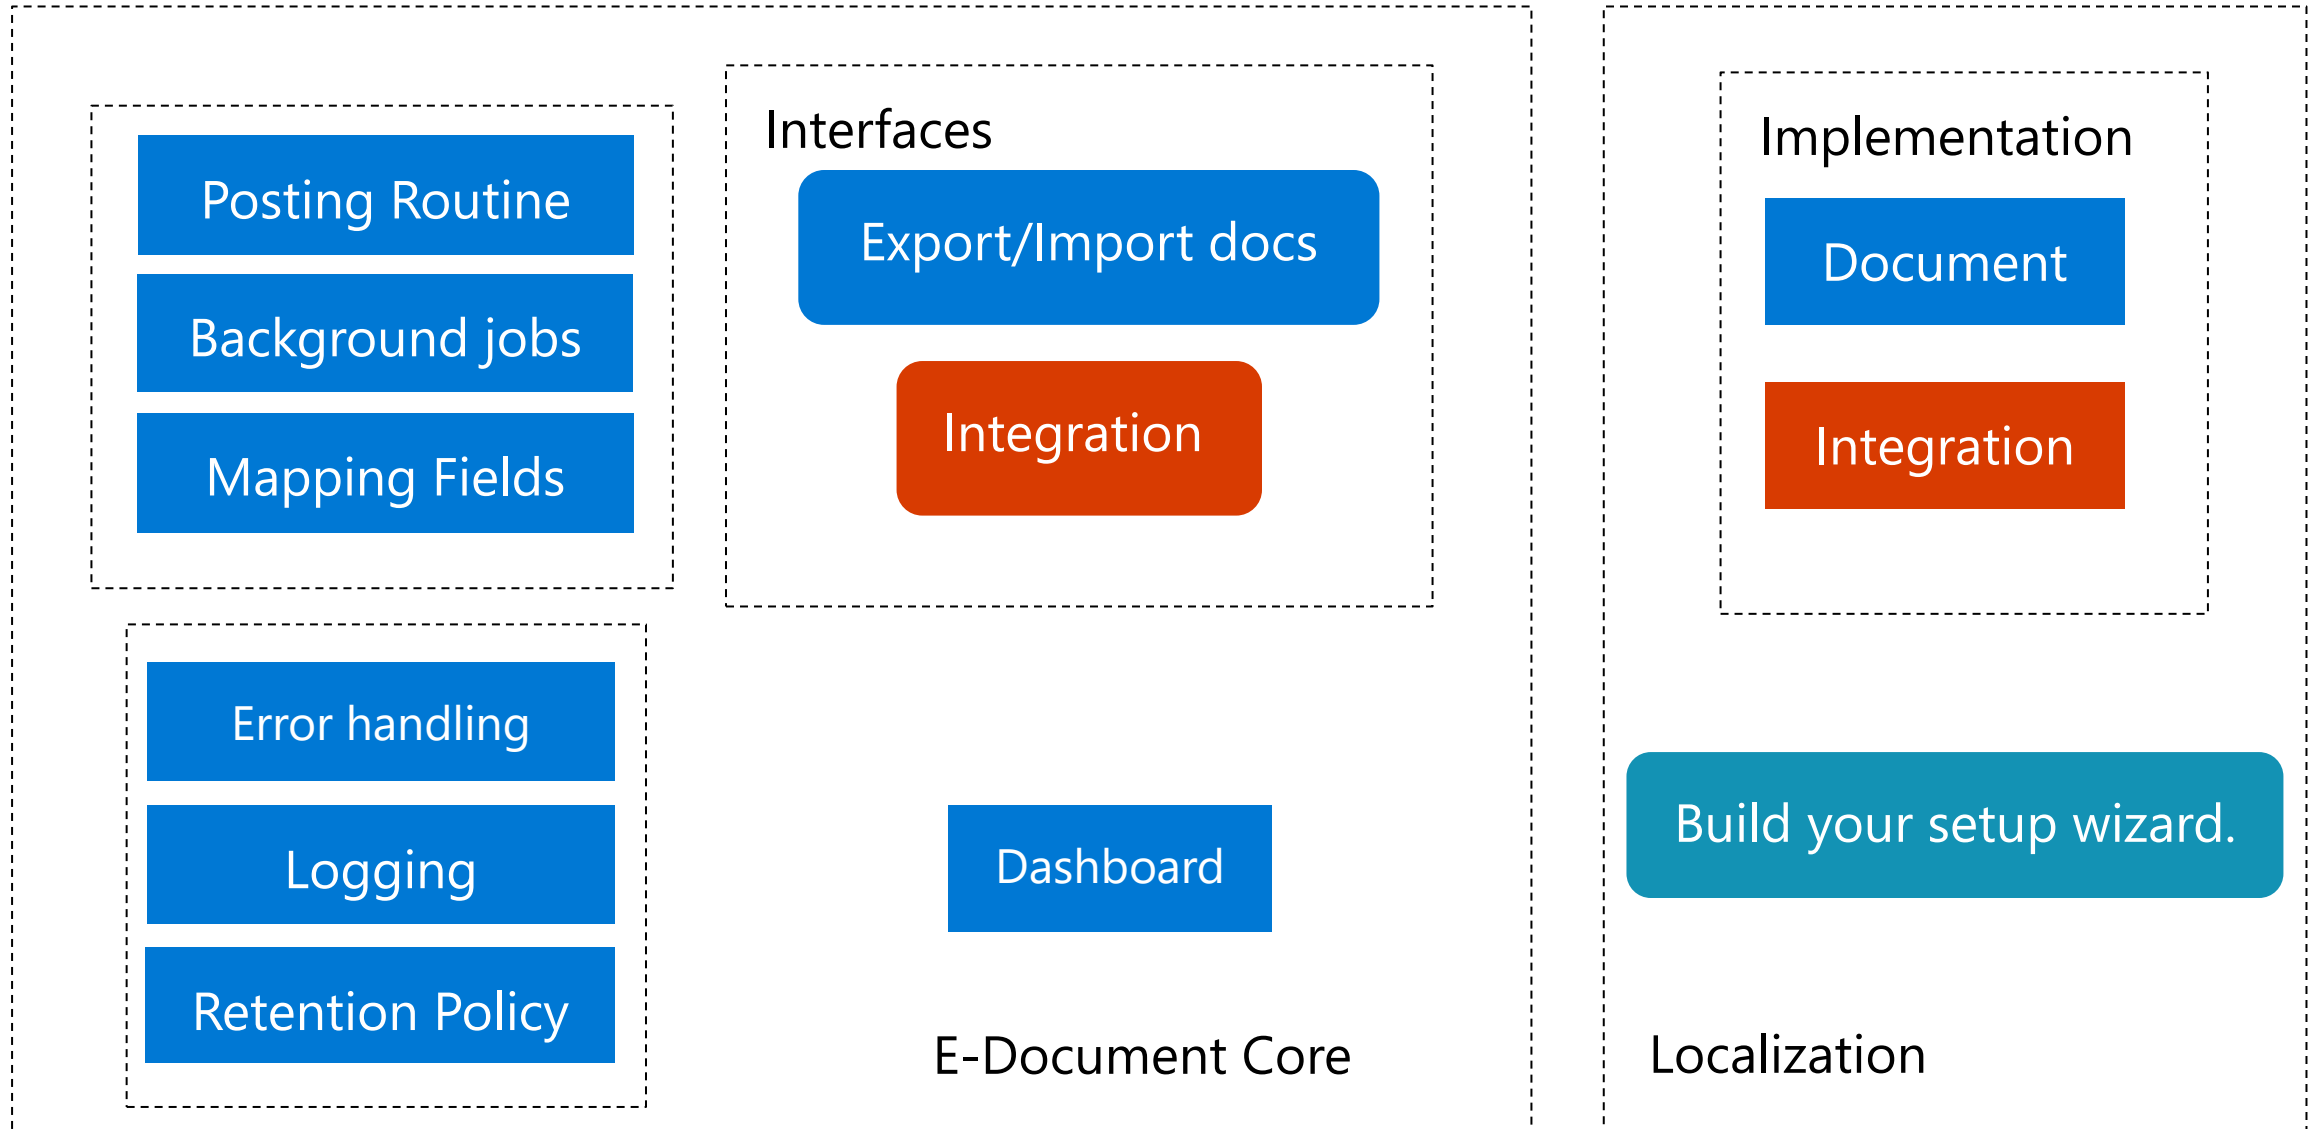

The Four-corner messaging communication

Global E-documents Idea

Building an E-Document application

Demo

Available features and the roadmap

Features Overview

Delivering of Sales E-Invoices from

Sales Invoice

Sales Order

Receiving of Purchase E-Invoices to

Purchase Invoice

Purchase Order (only creating, not updating existing one)

Sales and Purchase Credit Memo

Configurable and Extendable

Messaging depends on the local features

Roadmap

Continued improvements:

First MS Extension for supporting 3rd-party Access Points (end of 2023)

Updating existing Purchase orders (in plan)

Localizations:

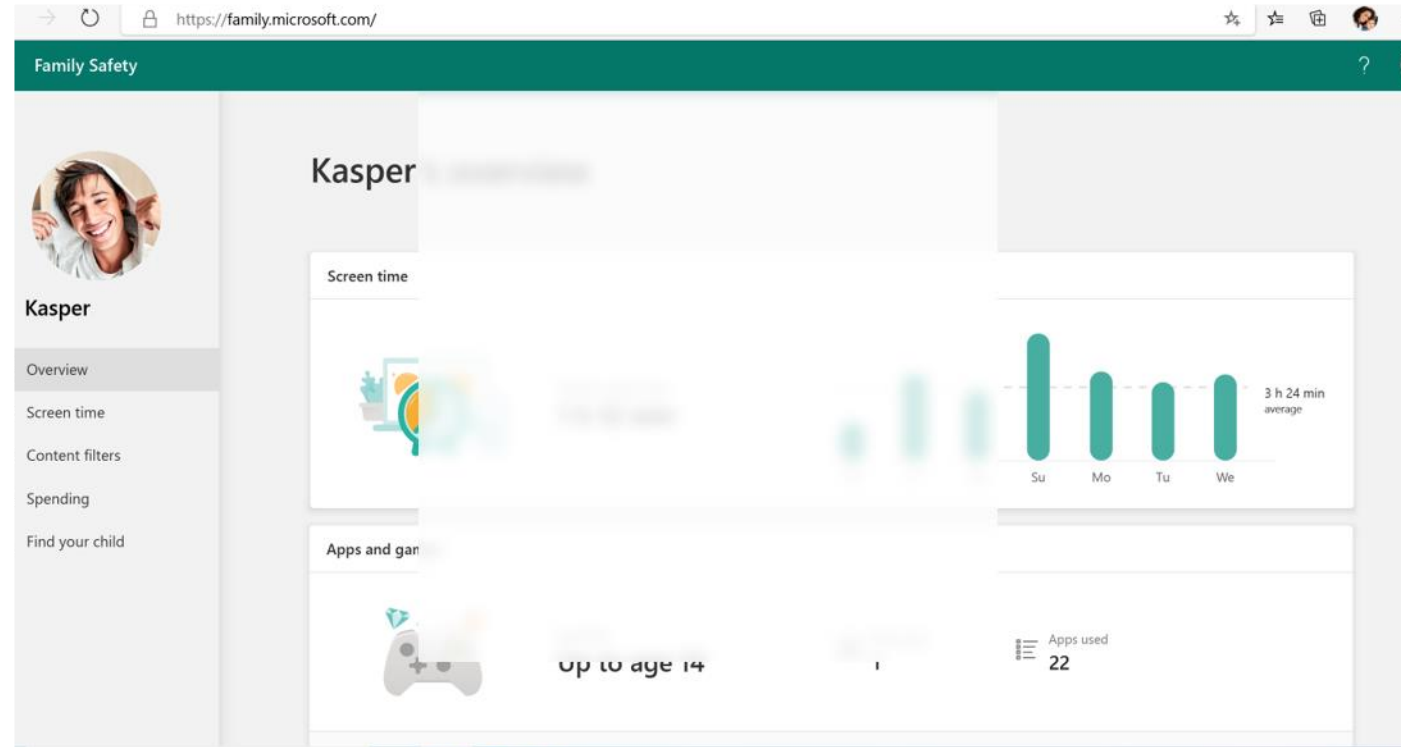

Depends on enforcement dates on local markets

Access Points?

Screenshot layout

Update this device frame placeholder to display a tablet or desktop screenshot. 16:9 UI screens work best.

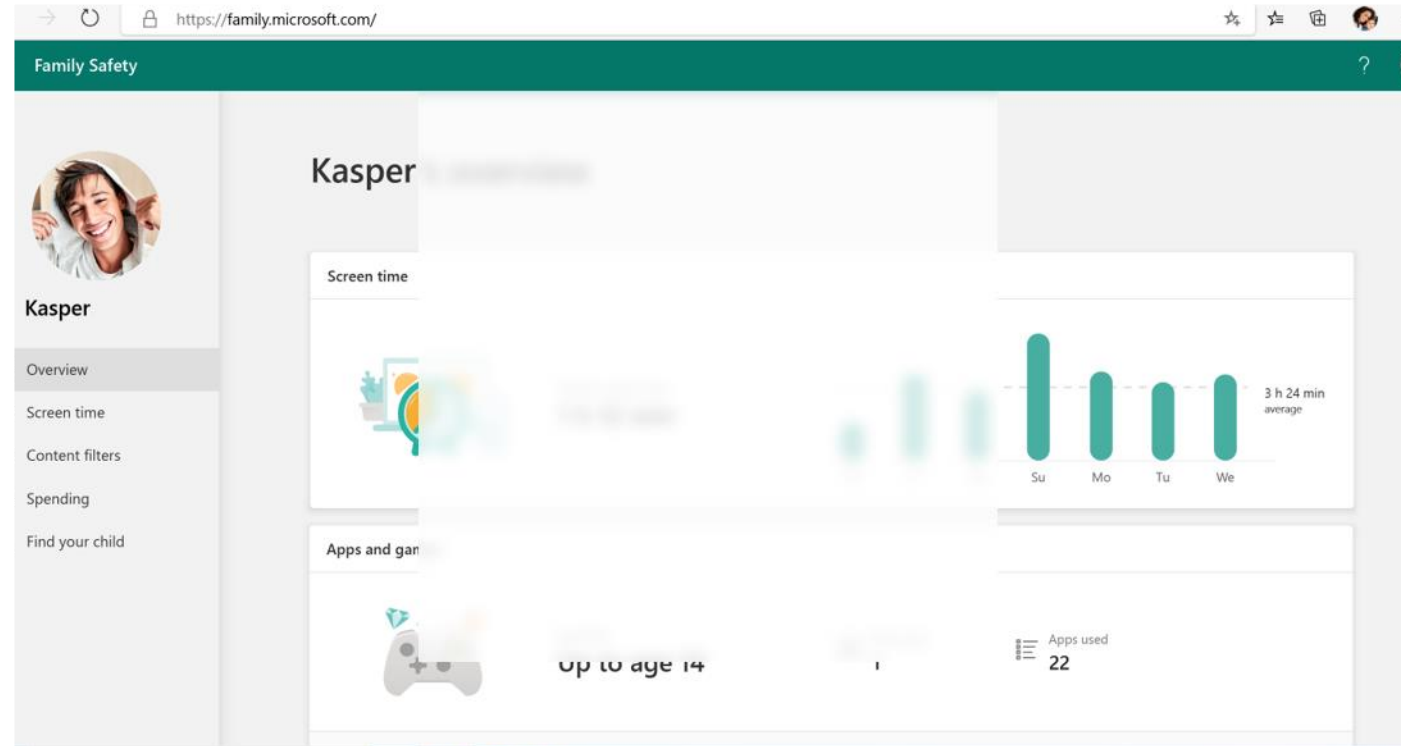

You may adjust the frame's placement on the slide, and/or the slide color to another template accent.
