Screenshot layout

Update this device frame placeholder to display a tablet or desktop screenshot. 16:9 UI screens work best.

You may adjust the frame's placement on the slide, and/or the slide color to another template accent.

Mobile screenshot layout

Update this device frame placeholder to display a mobile screenshot.

You may adjust the frame's placement on the slide, and/or the slide color to another template accent.

Agenda

-
- Click to add text

Text layout (without bullet points)

Main topic: Segoe UI, size 28pt

Segoe UI, size 20pt for second level

Segoe UI, size 16pt for third level

Text layout with bulleted text

- Learn how to adjust list levels
- Follow the steps on the right

Use the “**Decrease List Level**” and “**Increase List Level**” tools on the **Home** menu to change text levels.

Try this:

1. Place your cursor in the line of text that says “Segoe UI, size 20pt for second level”
2. Next click the Home tab, and then on the “**Decrease List level**” tool. Notice how the line moves up one level.
3. Now try placing your cursor in one of the top “Main topic...” line of text. Click the “**Increase List Level**” tool and see how the text is pushed in one level.

Use these 2 tools to adjust your text levels as you work

Two text columns with subheads

Add a subhead here

- This placeholder is designed with bulleted text
- It's easy to remove bullets
- Select the text, then on the Home menu, click the bullet list icon

Add a second subhead here

- Keep the top edge of text blocks aligned
- More text
- More text

Three text columns with subheads

Space for a two-line subhead here

- This placeholder is designed with bulleted text
- It's easy to remove bullets
- Select the text, then on the Home menu, click the bullet list icon

Wrap short subheads

- Keep the top edge of text blocks aligned
- More text
- More text

Adjust lower text blocks up or down

- Keep the top edge of text blocks aligned
- More text
- More text

Four text columns with subheads

Space for a two-line subhead here

- This placeholder is designed with bulleted text
- It's easy to remove bullets
- Select the text, then on the Home menu, click the bullet list icon

Wrap short subheads

- Keep the top edge of text blocks aligned
- More text
- More text

Consistent line wraps look better

- Keep the top edge of text blocks aligned
- More text
- More text

Adjust lower text up or down as needed

- Keep the top edge of text blocks aligned
- More text
- More text

Slide palette info

The PowerPoint palette for this template has been built for you and is shown below.
Avoid using too many colors in your presentation.

PowerPoint Theme Accent colors

Use **Accent 1** as the main accent color.

Use **Accent 2** and **Accent 3** only when additional colors are needed.

*Ensure text on Accent 3 has sufficient size and weight to meet color contrast ratios.

Use **Accents 4-6** sparingly

Ensure slide content is accessible

Take the following steps to create accessible content that everyone can consume effectively.

Contrast

Use high contrast colors for maximum readability
The recommended contrast ratio is at least 4.5:1

Color Contrast Analyzer

Download this tool to determine the legibility of text and the contrast of visual elements

Shape and color

Use different shapes with a legend to indicate statuses to accommodate for color blindness

Example:

Subject 1	●
<hr/>	
Subject 2	▲
<hr/>	
Subject 3	×
<hr/>	
● C1	▲ C2
×	C3

Alt text

Alt text helps people with screen readers understand the content of slides
You should create alternative text for shapes, pictures, charts, tables, SmartArt graphics, or other objects

Here's how:

- Right click on item
- Select **Edit Alt Text**
- Enter a **Description**

If an object is meant to add visual styling and doesn't contain meaning (e.g. stylistic borders), do not add alt text and instead check **Mark as decorative**

Slide layouts

Using a built-in slide layout that matches your content ensures a hierarchical reading order of text blocks

Example:

If a new slide will have a title, rather than starting with a blank layout and adding a text block for the title, choose one of the built-in layouts with a title placeholder

Reading order

Screen readers describe content on the screen in the order it was created

To ensure your content is read back in the order you prefer, arrange your objects in the Selection Pane appropriately. Objects on the bottom of the selection pane are read first

Here's how:

- Click the **Home** tab
- In the **Drawing** group, select the **Arrange** drop-down menu
- Click **Selection Pane...**

Additional tips

Be sure to run the **Accessibility Checker**! Go to **File** → click the **Check for Issues** drop down menu → click **Check Accessibility**

Videos need to be accessible: If your presentation includes a video, ensure it is captioned and audio described (if appropriate)

Visit the [Office Accessibility Center](#) to learn more about accessibility in PowerPoint

Brand and accent colors accessibility

Type and background combinations must meet a minimum 4.5:1 contrast ratio to help ensure people of all abilities can access and understand our communications.

Pick colors carefully and avoid relying on color alone to convey information. Always provide text or other graphical cues to guide customers to our message.

Examples demonstrate correct color use for on-screen applications.
